

Emre Dalgic

Website Designer

Design has been at the centre of my work since 2014. I'm a recent Master's graduate with 5 years of professional experience - 3 years in UX/UI Design and 2 years in architectural design - alongside collaborations with 12+ external companies in academic and professional journey. I create human-centred designs that connect business objectives with user needs, to turn complex problems into intuitive, data-driven solutions.

Professional Experience:

UX/UI Designer | GROHE (LIXIL)

Düsseldorf, Germany (hybrid), 09/2023 – 08/2026, 3 years

- **Concept design:** Contributed to the design of a unified global website that consolidated multiple sub-brand websites, services, and digital platforms into one product ecosystem.
- **UX design:** for product campaign landing pages, creating tailored user journeys, wireframes, and page experiences that supported diverse product collections while aligning with the vision for a unified global website.
- **Design check:** Collaborated with an external UX agency throughout the design, validation, and UAT phases, reviewing layouts, templates, and UI components to ensure quality.
- **Design adaptation:** Supported the migration of 400+ website pages to the new design system, adapting content into reusable templates and consistent user journeys across product, service, inspiration, and legal content.
- **Rollout and Localisation:** Assisted with the global rollout and localisation of the platform, partnering with regional stakeholders to adapt content for local regulations, languages, and market requirements while maintaining a globally consistent user experience.
- **Technical support:** by managing CMS content (FirstSpirit, Sitecore), digital assets (CELUM), translations (Phrase), product data (SAP-Hybris), and analytics tracking, while collaborating with cross-functional teams to deliver consistent experiences across 60+ markets.

Design Architect | HAZAN Architecture

Ankara, Türkiye (on-site), 10/2020 – 09/2021, 1 year

- **Design sprints:** Participated in 5+ design competitions, delivering full-scope projects within tight 14-day sprints through focused effort and close team collaboration.
- **Technical drawing & documentation:** Produced building survey drawings, restoration plans, sections, and detailed drawings of architectural elements, including damage analysis and 3D modelling across various projects.
- **Client communication:** Prepared and presented slides and poster presentations to clients.

Education:

Design and Interaction, M.A. | Rhine-Waal University of Applied Sciences

Kamp-Lintfort, Germany, 2022 – 2026

- **Thesis:** "Designing Multimodal Chatbot Interactions for Joseph Beuys Laborraum in Museum Schloss Moyland"

Architecture, B.Arch. | Middle East Technical University

Ankara, Türkiye, 2014 – 2020

- **Full year internships in 3 different areas:** Building survey drawing and material workshops (METU), Site architect (MESA Mesken), Design architect (Mimarlar ve Han Tümertekin)

Certificates:

AI for Designers | IxDF, Interaction Design Foundation

UX Design Professional Certificate | Google
